

Get Personal

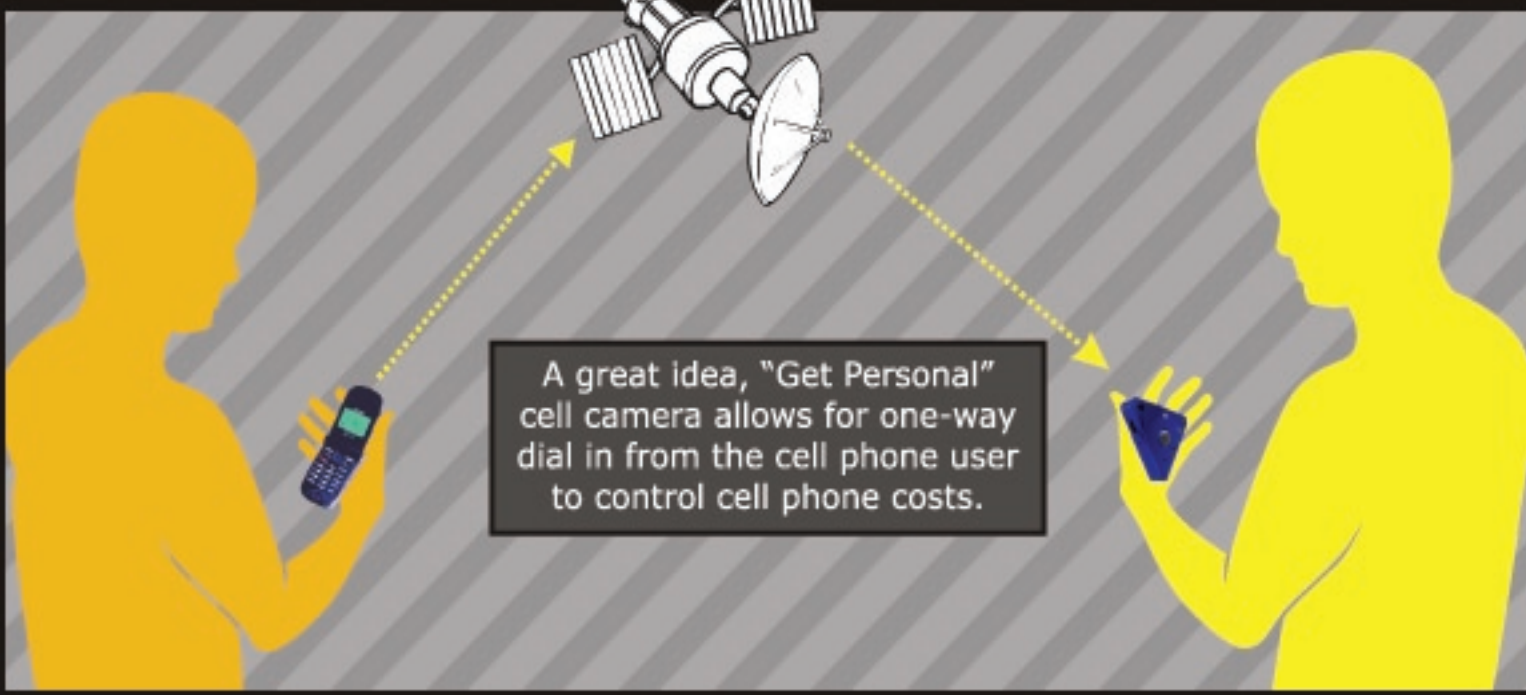

with video and audio transmission and reception

"Get Personal" the cell camera that allows the user to get personal.

- All the benefits of the "Cell Camera", around your neck.
- A motion sensor that cuts on "Get Personal", cell camera auto dialing into the cell phone user.
- Push button switch for light at night.
- Speaker to hear or earphone input for privacy, and microphone.
- Convenient off/on switch, incoming call beep & volume control.
- Push button on unit controls lens for panning and zooming; and this can also be controlled by an appropriate cell phone.
- A convenient optional light for night.
- A swivel attachment allowing the unit to be easily turned.
- A video screen in the back of the unit allowing for two-way live video reception if the cell phone has video output.

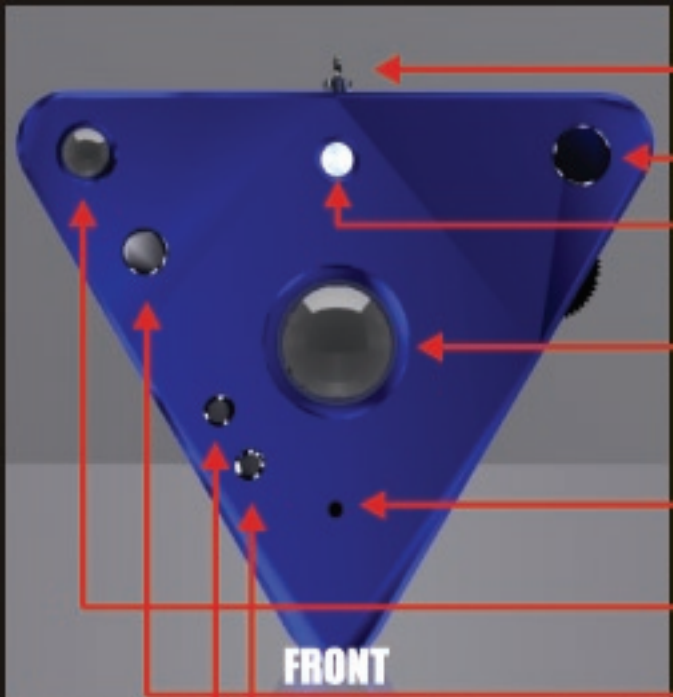

A great idea, "Get Personal" cell camera allows for one-way dial in from the cell phone user to control cell phone costs.
